Minutes of Meeting
Colbert Water Sampling Committee
October 29, 1991

Present: Scott Fink, (b) (6), Bill Wedlake

I. ANNUAL SAMPLING PLAN

Bill provided Scott and (b) (6) copies of the Annual Sampling Plan for their review. The plan will be examined more closely in the December meeting. Bill also gave out copies of the summary report showing all sampling results for each well since the start of the program through September 1991.

II. SAMPLING RESULTS

A review of the September sample results indicate that there were no significant contaminants detected in this round.

The October samples were tested using a different E.P.A. method. The lab was in error and will make the proper adjustment on the November invoice. The wells that were tested in October will be tested again in November.

III. MISCELLANEOUS

Bill is responding to the letters from Mike Kuntz and Neal Thompson concerning the project Management Plan. The Management Plan will be drafted by Bill and sent to Scott and (b) (6) for their review and input.

There will be a meeting regarding institutional controls November 7, 1991 at the Health District. Attending will be members of various departments of both the County and the State. Bill will update the Committee of any information he is provided about this meeting.

NEXT MEETING: First week of December.

TOPICS: 1992 Annual Sampling Plan
Review of October and November lab results and field notes
